

Ergo ratchet straps | 50 mm | 2 pieces

- **Durable and reliable:** These 50 mm wide ratchet straps are surprisingly strong despite their narrow profile, offering a lashing capacity of 5.000 kg, making them ideal for securing loads during transport.
- **Versatile colour options:** Available in multiple colours including blue, orange, fluorescent green, and black, these straps allow for easy organisation and colour-coding of your load.
- **Ergonomic Design:** Features an ergo ratchet that allows users to pull instead of push to tighten the strap, offering a more user-friendly and ergonomic experience compared to standard ratchet straps.
- **Comprehensive safety features:** Complies with EN 12195-2 standards and the EC machine directive, with a recommended inspection before each use to ensure maximum safety and reliability.
- **Pointed claw hooks:** Equipped with 1006 claw hooks on both parts, allowing for secure attachment to rings or other anchor points.
- **Two-part system:** The strap consists of a ratchet part (0.40 meters) and a strap part (8.60 meters), providing flexibility for various applications, whether you're securing pallets in a warehouse or heavy goods for cross-country transport.
- **Water caution:** The straps may lose colour when exposed to water, so it's important to keep them dry to maintain their appearance.

Type	50 Ergo
LC	5.000 kg
daN	2500/5000
Strap size	50 mm
Total length	9 meter
Thickness	2 mm
Hook type	Claw hook, 1006
